OVERVIEW

HotelStar units are designed to be a very fast & easy to handle air cleaner in hotel rooms.

HotelStar Air purifier comes ready to use and run fully automatically once they are powered up. The operation time varies between 30 – 120 mins depending on the size of the room and the level of contamination to eliminate odors like cigarette smoke, food/cooking smell, pet smell and residual body odors resulting from the previous occupant. The affected area is completely cleaned by our innovative UV-enhanced oxidation technology, photo-electrically from UV light and microorganism / microbial pathogens, both air borne and on surface are reduced to the minimum.

HotelStar Air Purifier can be used to meet different room conditions, optimizing its performance. It can clean 3000 times better than any chlorine based product and 10 times more efficient than most disinfectants; using the only complete sterilising agent at ambient temperature.

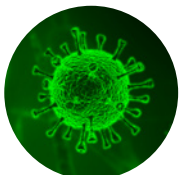

SPECIFICATION

HotelStar

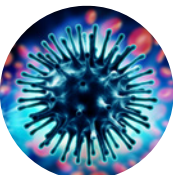

Input Voltage	220–240 Volt, 50/60 Hz, single phase
Dimensions	470 x 390 x 150mm
No. of UVC lamps	2 nos.
Lamp life	10000 hours
Air Flow	280 m ³ /h
